## PROFESSIONAL SUMMARY

---

Machine Learning Developer with 1 year of professional experience at Vijay Software Solutions, with hands-on experience building practical AI and software solutions using Python, Machine Learning, Deep Learning, Computer Vision and data analytics. Experienced in developing face recognition and emotion detection systems, real-time text trend analysis, and healthcare applications. Strong interest in turning real-world problems into usable AI-powered products.

## PROFESSIONAL EXPERIENCE

---

### Machine Learning Developer | Vijay Software Solutions | 1 Year

- Developed Machine Learning solutions for real-world business applications.
- Performed data preprocessing, feature engineering, model training, evaluation and model integration.
- Worked with Python, SQL, Scikit-learn, TensorFlow and OpenCV to develop and integrate AI solutions.
- Collaborated with software development teams to improve AI model performance and application functionality.

## FEATURED PROJECTS

---

### Face Attendance System using Face Recognition

*Python | OpenCV | Deep Learning | Computer Vision*

- Developed an intelligent attendance system that automatically marks attendance after successful face verification.
- Implemented face recognition and Eye Blink Detection as an anti-spoofing mechanism to reduce photo-based attendance.
- Designed a workflow for face registration, feature representation, live verification and attendance recording.

### Emotion Detection System

*Python | Deep Learning | Computer Vision | OpenCV*

- Built a facial-expression analysis system that detects faces and predicts emotions from facial expressions.
- Designed the application to process multiple faces in a frame and display the predicted emotion for each detected face.
- Applied image preprocessing and Computer Vision techniques for practical real-time emotion analysis.

## FEATURED PROJECTS – CONTINUED

---

### MedBuddy – User App

*Flutter | Dart | Firebase | Firestore | Google Maps | Razorpay*

- Developed the patient-facing mobile application for healthcare assistance, hospital selection and appointment workflows.
- Implemented phone OTP authentication, location and hospital selection, department/doctor selection and booking flows.
- Integrated Google Maps for location and trip-related features and Razorpay for wallet/recharge and payment functionality.
- Used Firebase and Firestore for authentication, application data and backend services.

### MedBuddy – Buddy App

*Flutter | Dart | Firebase | Firestore | Google Maps*

- Developed the Buddy-facing application supporting Transport Buddy and Hospital Buddy workflows.
- Implemented trip-related workflows, location tracking and coordination features for assisting patients during hospital visits.
- Integrated Firebase/Firestore for backend data management and Google Maps for location and trip functionality.
- Designed the Buddy application to work alongside the MedBuddy User App as part of the same healthcare ecosystem.

### Tracking Hot Topic Trends in Text Streams using Sequential Evolution Model

*Python | Machine Learning | NLP | Data Analytics*

- Developed an intelligent system to detect emerging topics from real-time text streams.
- Used distributed representations and sequential evolution models to analyze changing topics.
- Focused on improving trend prediction for social-media and news-style text streams.

## TECHNICAL SKILLS

---

**Programming:** Python, Dart, SQL, JavaScript

**Machine Learning:** Machine Learning, Deep Learning, Data Preprocessing, Feature Engineering, Model Training, Evaluation

**Computer Vision:** OpenCV, Face Recognition, Facial Emotion Detection, Image Processing

**Frameworks & Libraries:** TensorFlow, Scikit-learn, NumPy, Pandas

**Application Development:** Flutter, React, Vite, Tailwind CSS

**Backend & Services:** Firebase, Firestore, Google Maps SDK, Razorpay

**Development Tools:** Git, GitHub, Jupyter, Virtual Environments

## EDUCATION

---

**Bachelor of Technology – CSE (AI & DS)** — Eluru College of Engineering and Technology, Eluru (2021 – 2025)

**Intermediate** — Sasi New Gen Junior College (2019 – 2021)

**SSC** — DePaul English Medium High School (2019)

## CERTIFICATIONS

---

- AWS Cloud Foundation
- AWS Solution Architecture
- AI-ML Virtual Internship – Job Simulation
- AWS Academy & Skill India
- Microsoft SOAR AI to Aspire
- Acquiring Data
- Data Analytics Essentials

## SOFT SKILLS & LANGUAGES

---

**Soft Skills:** Problem Solving | Team Collaboration | Communication | Time Management | Critical Thinking | Quick Learning

**Languages:** English | Telugu
